Art Unit: 3683

1. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite in the recitation of "a brake beam", which is confusing because "two brake beams" are previously recited. Claims 2-21 are indefinite due to their dependency on claim 1.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Barefoot.

4. Claims 1-2, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kirk.

Note brake cylinder integrated into brake beams. Note also push rods 20 and adjusting mechanisms 29.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of

Art Unit: 3683

each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirk.

The claimed invention differs from Kirk only in the size of the brake cylinder and the arrangement of the push rods. It would have been obvious to one of ordinary skill in the art to have angled the push rods as a mere re-arrangement of parts without any evidence of criticality, see *In re Japikse*, 86 USPQ 70 (CCPA) 1950. To have had the stroke of the piston longer than the width would have been obvious to one of ordinary skill in the art as a mere aspect of design consideration, such as to optimize performance.

8. Claims 6-15 and 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jackson and Newell show brake beam assemblies.
